

Medical Transportation Membership for Employee Benefits

Here are the Facts

- Medical ground ambulance is typically covered by health insurance only to the closest medical facility.
- In the U.S. there are 550,000+ helicopter ambulance trips needed per year to help save lives during medical emergencies.
- Neither ground nor helicopter ambulance transports are fully covered by health insurance, leaving families with thousands of dollars in bills owed to the ambulance companies.
- 150,000 medical airplane transports to specialty medical facilities happen each year. Also, these transports happen to return home people who are ill or injured while traveling. These flights are not covered by health insurance!
